# Description

The Robbie Platform is the fully updated, new version of the original Robbie Swifthand and the Orb of Mysteries. The new Robbie Platform happened in a mysterious basement, which has the shiny jewels, the exciting barriers.  All it is about is to explore and adventure in the basement, steal the jewels from the basement, and find a way out. When the player is playing our game, he / she can walk, collect items, and avoid obstacles. And the time recorder on the top right would record your time for each level so you can challenge yourself every time. And the jewel collector recorder would record how many jewels you have stolen in each level. Overall, this game will challenge the player's skill to stay alive and complete the mission.
